## **HYDROGEOPHYSICS TECHNICAL SESSION**

**WED 14 OCTOBER 2026**

The session will feature a keynote address, presentations and opportunities for in-depth discussions between researchers and practitioners shaping the future of water-focused geoscience. It will be held back-to-back with another technical session of the conference on **Engineering Geophysics**. This will provide a unique opportunity for a seminar-like day of the applied geophysics, engineering, and groundwater communities getting together to share the most recent advances in the field of hydro-geophysics and its application in solving various hydrogeological and engineering problems, from groundwater sustainability to environmental remediation.
